

SAFDAR AZAM

Java Full Stack Developer | Spring Boot Backend Developer
safdarazam373@gmail.com | +91 6207274850 | Bangalore, Karnataka | [LinkedIn](#) | [GitHub](#)

PROFESSIONAL SUMMARY

Java Full Stack Developer with training in Core Java 8/11/17, Spring Boot, Spring MVC, Spring Security, Hibernate ORM, Spring Data JPA, and RESTful API development. Skilled in building secure backend systems using SOLID Principles and Design Patterns. Hands-on experience with Git version control, SQL databases, and Agile/Scrum delivery. Immediate joiner seeking a Java Developer or Backend Developer role.

TECHNICAL SKILLS

Languages: Core Java (Java 8/11/17), SQL, JavaScript, HTML5, CSS3

Frameworks & Libraries: Spring, Spring Boot, Spring MVC, Spring Security, Spring Data JPA, Hibernate ORM, JDBC, Servlets, REST API

Database: PostgreSQL, MySQL

Tools: Git, GitHub, Maven, VS Code, Eclipse, Postman, Swagger/OpenAPI

Concepts: OOPs, DSA, Collections Framework, Multithreading, Streams API, Lambda Expressions, Exception Handling, JWT Authentication, BCrypt, RBAC

INTERNSHIP / TRAINING

Java Full Stack Development Training — Spiders Training Institute, Bangalore **Aug 2025 – May 2026**

- Completed 9-month intensive training in Java Full Stack Development covering Core Java, Advanced Java, Spring Boot, Hibernate, SQL, HTML, CSS, and JavaScript.
- Developed 3 full-stack web applications and REST APIs using Spring Boot, Spring Security, JWT authentication, and PostgreSQL/MySQL databases.
- Documented APIs with Swagger/OpenAPI 3.0 and used Git with feature-branch workflow across all projects.

PROJECTS

Connexa – Smart Contact Manager Spring Boot | Spring Security | Spring Data JPA | Hibernate | PostgreSQL | JWT | BCrypt | REST API | Swagger | HTML5 | CSS3 | JavaScript

- Built a secure full-stack Contact Management System with JWT-based authentication, BCrypt password encryption, and RBAC via Spring Security; documented all REST endpoints with Swagger/OpenAPI 3.0.
- Integrated PostgreSQL with Hibernate ORM and Spring Data JPA for CRUD operations, profile image upload, and paginated contact search across 500+ records; applied DAO and Service Layer patterns with SOLID Principles.

Student Management System Core Java | Servlets | JDBC | PostgreSQL | MVC | HTML5 | CSS3 | Git

- Developed a CRUD-based Student Management System using MVC architecture and JDBC PreparedStatements to prevent SQL injection; designed a normalized PostgreSQL schema with indexing for optimized query performance.
- Implemented search, filter, and server-side pagination for 500+ student records; deployed on Apache Tomcat following Controller → Service → DAO layered architecture.

EDUCATION

B.Tech in Computer Science — Rungta College of Engineering & Technology, Bilai 2025 | CGPA: 8.1/10

PROBLEM SOLVING & DSA

- Solved 100+ problems on LeetCode and HackerRank in Java covering Arrays, Linked Lists, Trees, Graphs, and Dynamic Programming; proficient in Two Pointer, Sliding Window, Binary Search, Recursion, BFS/DFS, and Big-O analysis.

KEY STRENGTHS

Analytical Thinking | Quick Learner | Team Collaboration | Self-Motivated | Strong Communication | Adaptable to Agile Environments | Immediate Joiner
